

PRODUCT DATASHEET

FARGO PRINTER DTC1250

Highlights

ECONOMICAL

The best price-quality ratio for societies with simple needs

PRACTICAL

- Ribbons loading directly from the front in cartridge form.
- Cartridge-integrated cleaning roller.
- The ability to reprint already personalized badges.

Main features

- Available with or without encoder
- XF3 encoder compatible with MICROSESAME 2021 version and higher
- Loading bin for 100 badges

Electronic and graphic personalization

The Fargo DTC1250 ISO card printer is a high-performance entry-level color printer. Connected via USB to a MICROSESAME server or client workstation, it is coupled with the badge background edition, which manages the (photo, text, logo, etc ...) and RFID encoding.

Single or double-sided, the DTC1250 is very easy to use and guarantees fast printing : 16 seconds, badge with a color ribbon or 6 seconds/badge in monochrome printing.

With a resolution of 300 dpi and 16.7 million colors, dye-sublimation technology delivers photographic-quality, raster-free printing. And with specific (sensitized) cards, monochrome reprinting on already personalized badges is possible.

The compact DTC 1250 printer nonetheless incorporates a 100 cardhopper. It is available with or without Mifare encoding head.
