OCR scanners

Enhance your visitor hosting capacities

The 3M CR100 scanner reads identity documents: ID cards, passports and other identity documents. Installed on a Web-SESAME client workstation, it makes visitor hosting more efficient by accelerating data processing.

OCR (Optical Character Recognition) allows the scanning of codeline data from Machine Readable Travel Documents (MRTDs) and other identity documents. Acquired data is automatically transmitted to the Web-SESAME interface.

Fast and efficient

This reader ensures high speed reading of codeline data in Machine Readable Travel Documents (MRTDs) and other identity documents.

Flexible - It can be adapted to a large set of document reading speeds.

Easy to install

It can be quickly connected to a Web-SESAME workstation by using the USB connector.

Its reduced size ensures its discreet positioning on any support.

Reliable

The lack of moving mechanical pieces makes this scanner extremely reliable.

No particular maintenance is required.

Detailed features

- Dimensions: H 47 x L 96 x D 33 mm
- Power supply: USB connexion, <400mA
- Supported documents: ICAO 9303 standard (ID cards, passports...)
- Maximum document depth: 1,5 mm
- Installation: optional desk mount
- Indicators: Power/test LED
- Operating temperature: 5°C to 35°C
- Operating humidity: 40% to 90% (non-condensing)

Reference

- SCAN_OCR : USB ID documents scanner
